Normality QC: values of each group
Points near the line support normality; mild, judged deviation is usually acceptable.
control (n = 90)
p = 0.26 skew = -0.28 kurt = 0.56
mixed culture (n = 70)
p = 8.9e-06 skew = 0.33 kurt = -1.49
serum-starved (n = 80)
p = 0.0015 skew = 0.86 kurt = 0.53
