Normality QC: values of each group
Points near the line support normality; mild, judged deviation is usually acceptable.
control (n = 90)
Shapiro p = 0.26 | skew = -0.28 | kurtosis = 0.56
mixed culture (n = 70)
hapiro p = 8.9e-06 | skew = 0.33 | kurtosis = -1.4
serum-starved (n = 80)
Shapiro p = 0.0015 | skew = 0.86 | kurtosis = 0.5
